

# EssenGEL™

## Essential REHAB SOLUTIONS

ESSENTIAL REHAB SOLUTIONS INC.

[www.essengel.com](http://www.essengel.com) / [www.essentialrehab.ca](http://www.essentialrehab.ca)

## Low Maintenance; Highly Effective

The EssenGel™ product line offers simple, yet highly effective, solutions for various skin protection challenges. Our Synergel™ polymer is a silicone based material, making it lighter and less likely to wick away body heat from the end user.

Because EssenGel™ is not a liquid gel, but a unique silicone based polymer you don't have to worry about leaks, punctures, cuts, deflating, oozing or bottoming out.

EssenGel™ is totally hassle free, durable and simple; yet manages pressure, reduces the effects of shear and manages heat and humidity build up.

### ■ Highlights

The EssenGel™ comes with the following options & benefits...

- 1/4" Pad
- 5/8" Pad
- Dimensions™ Pads
- 2 and 5 year warranties\*
- Repairable
- Low maintenance
- Customizable
- Custom sizes available

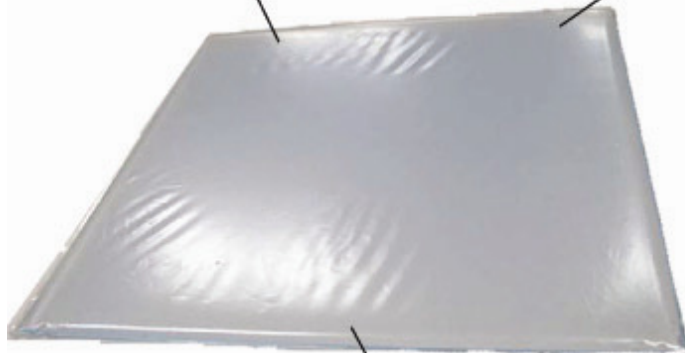

Please see website for full details

#### Weight

The cushion is made from a silicone polymer that is lighter than other gels.

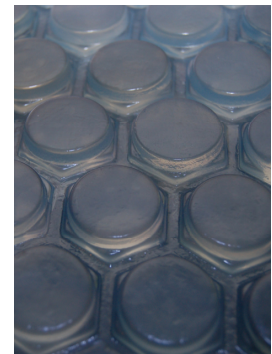

#### Temperature

The Silicone Polymer does not wick away body heat from the user as much as other gels

#### Durability / Adaptability

A special bonding agent is used to attach the skin to the Gel. The gel is able to be cut, customized and re-sealed.

**Dimensions™ Pad:**  
Ideal for added Shear Reduction and Immersion.
